Vinten Vector 70 head  
not included

### Technical description:

The Vinten Fulmar is a professional camera pedestal with gas suspension, using nitrogen as the damping medium to ensure stable and smooth operation.

#### **Key Features:**

##### Gas Suspension:

Unlike older models that relied on oil, the Fulmar uses nitrogen for quiet, low-friction raising and lowering of the camera.

##### Stability:

Engineered to provide exceptional stability for professional studio cameras.

##### Smooth Operation:

Enables precise and fluid camera movements, ideal for television and broadcast studio environments.

##### Extendable Column:

The telescopic design allows flexible height adjustments to support high-quality production shots.

The Vinten Fulmar was a pioneer in pedestal technology, being one of the first models to replace oil damping with advanced nitrogen technology.
