3G level B ready

Price on request:

Excl. VAT

Excl. shipping & insurance costs

Excl. custom fees

For sale: 1x used Probel Cygnus 276x576 Video Matrix

Video matrix:

The Video matrix is 3G ready – **Level 3G-B**

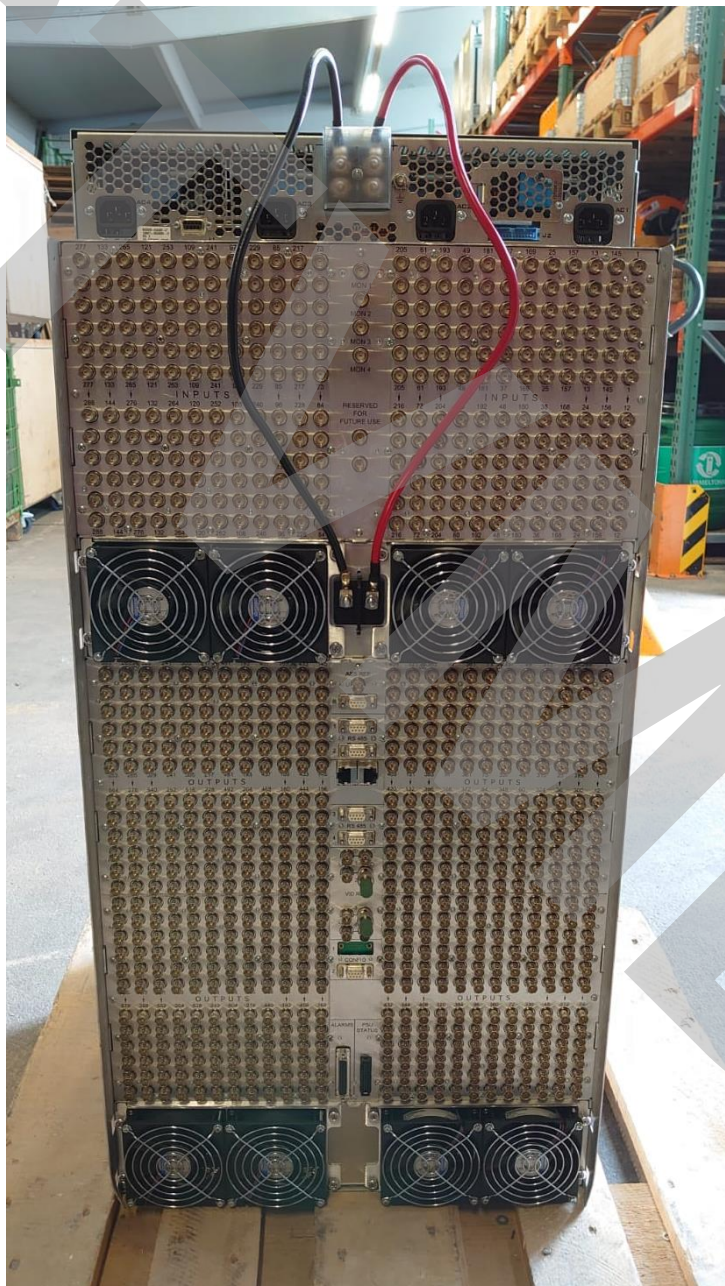

Level A is a direct mapping of the video signal into a **3G** SDI signal (similar how 1.5gb HD-SDI is formatted)

Level B-DL simply multiplexes the two signals from the dual-link format, as-is, into one **3G** SDI signal.

Level B-DS multiplexes two separate 1.5gb HD-SDI signals into one **3G** SDI signal.

So LEVEL B means, that a SSLM phase can be transferred/routed like a 6x in 3x LEVEL B to an EVS to use the signal. This is a 3G signal, but coded differently and cannot be mixed with LEVEL A.
