IQSP setup including server, 24MP panorama IQ-xCam camera (max. 60fps), camera license, Linkmatrix access for management and control.
Solution for setups between 0 meter and 50 meter from the pitch

Workflow system:

IQ-Sports Producer (IQ-SP) is a leading AI system that automates a televised professional sports production but without the need of a camera team or director. Ideal for sports games that don't have the capital and production resource of the major leagues, it is ideal for tier 2 leagues, sports rights holders, colleges and schools as well niche sports events. It can be utilized by major clubs for training sessions, U21, U18 and other grass roots games where budget constraints prevents a full on-site production and outside broadcast team.

At the heart of the system is the IQ Artificial Intelligence (AI) engine that can follow the action either outside on the pitch, or indoors on the court. IQ-SP can be used remotely to live stream and record games and includes many features that you would expect for a compelling viewing in a professional match including score board, time, highlight detection and replays. At the end of the game, IQ-SP has the ability to
automatically create an edit of the highlights as a summary of the match.

From live streaming on social media to live playout at a traditional broadcaster, IQ-SP can be acquired with an array of options for a variety of budgets. From high schools to major production companies and national broadcasters, IQ-SP can reliably create multiple live streams with compelling content that can be used by online platforms with IP workflows, or for high quality productions by traditional national
broadcasters needing HD-SDI workflows.

Sports supported:

Ball games: mix of indoor and outdoor including soccer, football, rugby, basketball, handball, ice hockey, futsal, netball, hockey. More sports are currently in training. Other sports: horse racing, jumping, dressage, cycling (velodrome).

Features:

• **Main camera:** 2 or 4 x 4K cameras stitched and de-warped (All field-of-play is captured and recorded)
• **Camera choice:** Panoramic - 30 fps webstream, 60 fps broadcast/webstream Side cameras - 60 fps single cameras (multiple per pitch)
• **Playout:** Social media / CDN (Cloud, RTSP, RTMP), HD-SDI (Decoder required)
• **Onsite setup:** Template / 1 hour (once only per site) on local IQ-SP server
• **Video streams:** 5 (Primary AI stream + 4 manual defined streams) – live stream or new views recreated from recording
• **Multiple streams:** AI can create multiple streams of action, broadcast, tactical, panoramic and defined views

For Sale: 1x used Mobile Viewpoint camera system – IQ Sports Producer

- **Scoreboard:** Overlay (auto via OCR /manual via LinkMatrix portal)
- **Time:** Overlay (auto / manual)
- **Graphics:** Static and HTML
- **Storyboard template for match:**
- Team logo's, team names
- Content to play at the start, during halftime and end of the match, pre-roll / post-roll configuration

- **Analysis:** Integration with analysis packages for trainers

Link Matrix Management
Cloud based portal for complete remote management. Includes Clipper for social media postings, scheduler, overlay control, destination selection, scoreboard control, highlight creation & replay, social media decoding and streaming.

Analysis Integration Layer
IQ-SP can simultaneously produce a broadcast view for livestreaming and a tactical view that can be used for an array of sports analytical packages.
IQ-SP has a close integration with Provispo that manages, and consults on analysis including a range of well known third-party analytical packages, with an online video storage platform. Upload of a video is an automatic process making content immediatly available locally for analysis by coaches and trainers on their mobile devices.
