

**FOR SALE:**

**Ex-demo Swedish LNB SMW-WDL-DRO Type B**  
**Fully functional**  
**Frequenzy Range: 10.95 – 11.70 / 11.70 – 12.75 GHz**  
**LO 10.0 & 10.75 GHz**  
**Gain 52dB typ**  
**NF 0.8 dB typ**

**In top condition**  
**Immediately available**

**Description**

This upgrade of the bestseller Ku Multiband (also known as Q-PLL) is build on the new innovative technology platform enabling new features and improved performance.

This product is switchable and ideal for full freedom of sub-bands available.

Designed for single band or multiple bands. Extended IF range 950-2150 MHz.

Legacy Voltage/Tone switching or optional Monitoring & Control functionality you are free to switch subband via Modbus RS485 and to monitor several performance parameters.

Also the configurable Alarm output alerts you if the signal reception is lost or the external 10 MHz LO reference disappear. Alarm triggers can be used in redundancy control applications.

The WDL DRO LNB supports reception of full Ku-band frequency range simultaneously on low and high band outputs. The LNB is ideal for installation in various professional TVRO applications.

Available with LO stability from  $\pm 3$  MHz to  $\pm 1$  MHz.
