

Used Clearcom Eclipse Mainframe

Firmware v14.1 Rev A.

Included cards:

2x MVX-A16-HX

1x IVC-32-HX

3x E-QUE-HX – **not mandatory (needed for FreeSpeak inclusion)**

3x Spare AC/DC Converters

Also available: V12, V24 and Desktop Panels

Possible upgrade to make it a state of the art system:

2x New Eclipse Omega PSU, product code 720379Z

1x EHX-UPGRADE firmware update

Upgrade frame and both CPU cards to EHX Version 15

Possible Hardware Upgrades:

IVC-32-HX → E-IPA-HX upgrade: The IVC-32-HX is End of Life. The E-IPA-HX supports matrix panels via IVC or AES67, as well as Agent-IC, Station-IC, SIP clients and AoIP streams. It also enables remote connections via LAN, WAN or the internet.

E-QUE-HX → E-IPA-HX upgrade: The E-QUE-HX is End of Life. The E-IPA-HX supports FreeSpeak IP transceivers as well as existing E1 transceivers.

+

E-IPA-HX capacity: The card initially provides 16 licensed IP ports. Additional licences can unlock further ports on the same card, increasing its capacity to 32, 48 or a maximum of 64 ports.

Built in 2012

Technical description cards:

The 2x MVX-A16-HX cards provide either:

32 analogue 4-wire ports, each with input and output or 32 ports for connecting matrix intercom panels

The IVC-32-HX card:

Supports the connection of up to 32 matrix panels via Clear-Com's proprietary yet routable IVC IP protocol, which can be carried through network switches. This allows the panels to be connected flexibly via IP.

The E-QUE cards:

Support E1 transceivers for a wireless FreeSpeak II system using a proprietary Clear-Com data protocol.
