Zoom&Focus demands are not included - on request

### Price on request:

Excl. VAT

Excl. shipping & insurance costs

Excl. custom fees

**Description & technical facts:**

The Fujinon ZA12x4.5-BERM-M58 is a high-quality 12x 2/3" lens designed to be used on 2/3" HD camcorders.

Known for their high build quality and precision optics, Fujinon lenses have become the industry standard for professional video applications all over the world. The focal-length range is 4.5-54mm with a minimum object distance of 0.6 m; or about 2 feet. In addition to unmatched image quality, the lens is also equipped with a wide array of extra features, including Inner Focus, Digi Power servo controls, and QuickZoom.

Internal focusing minimizes the effects of lens breathing, which ensures a more consistent focal length when adjusting focus. Fujinon's QuickZoom technology improves zoom speed to 0.7 seconds end to end. With the push of a button, QuickZoom facilitates a rapid shift to the telephoto end to check focus. Releasing the button automatically returns the lens to the previously selected focal length. Finally, the Focused Intelligent Network Diagnosis (FIND) system aids in preventive maintenance and troubleshooting by evaluating various electronic and mechanical parameters.

4.5-54mm 12x zoom lens for 2/3" cameras

2x extender

Fast f/1.8 max aperture at 4.5-41mm and f/2.4 at 54mm

Servo zoom and manual focus
